

## About Us

Founded in 1990, Cornerstone services over 500 clients throughout North America, as well as in Japan and the EU (European Union).

Cornerstone's primary objective is to assist client companies in achieving long term business sustainability and minimizing their environmental footprint by:

- Ensuring Regulatory Compliance
- Reducing Energy Consumption
- Increasing Operational Efficiencies
- Adopting Green Business Practices

In addition to dealing with issues regarding their existing facilities, new construction sites and acquisition projects, this collaborative approach has allowed our clients to make proactive decisions regarding:

- Process Efficiency
- Quality
- Customer Requirements
- Loss Prevention
- Permitting
- Reporting
- Planning
- Training

We understand that synergies exist between process efficiencies, quality, customer requirements, environmental regulations and employee safety, and that changes to one area can affect other areas.

Using a holistic approach that looks beyond compliance, Cornerstone works to uncover opportunities for improvement and will assist in making proactive decisions to enable client organizations to be more competitive.

Cornerstone's innovative approach allows operational changes to be easily integrated into an Environmental Management System (EMS) while adhering to regulatory obligations, maintaining conformance and improving profitability.

**Sustainability solutions for a global economy.**

## OHSAS 18001 Lead Auditor Training

RABQSA certified course provider is Pillar Management Associates.

Training delivered by Cornerstone Environmental, Health and Safety, Inc. at our Zionsville, Indiana Headquarters.

### Meet the requirements for competency-based certified OHS provisional auditor

- Workbook provided: In-depth review of each element of the OHSAS 18001 standard
- Breakout sessions: Identify hazards and risks and documentation requirements, prepare audit plan, audit checklist, systems audit, opening and closing meeting agendas, non-conformances and audit report
- Slide presentations illustrating actual companies and their health and safety issues
- No prior ISO 14001 Lead Auditor experience needed

#### RABQSA-OH

- Understand OHS laws, principles, codes of conduct and standards
- Identify OHS hazards that are reasonably expected to occur
- Assess the risk of identified hazards
- Assess the effectiveness of methodologies to control OHS hazards
- Assess the OHS roles and responsibilities within the context of the organizational environment
- Determine the adequacy and effectiveness of an OHS management system

#### RABQSA-AU – Management System Auditing

- Understand the application of the principles, procedures and techniques of auditing
- Understand the conduct of an effective audit
- Understand the application of regulations and the conduct of the audit
- Practice personal attributes necessary for the effective and efficient conduct of an audit

#### RABQSA-TL – Leading Management System Audit Teams

- Establish, plan and task the activities of an audit team
- Communicate effectively with the auditee and audit client
- Organize and direct audit team members
- Prevent and resolve conflict with the auditee and/or within the audit team
- Prepare and complete the audit report

**Expert Instructor:** Shayla Barrett, RABQSA-Certified EMS Lead Auditor and RABQSA-Certified Provisional OHS Auditor, CMTI
